Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Prior to setting forth the restriction requirement, it is pointed out that the claims are drawn to patentably distinct products. The products rely upon compounds which differ in structure to such an extent and require non-coextensive searches to such an extent that they are considered separately patentable. Therefore, the restriction will be set forth for each of the various groups, irrespective of the format of the claims.

- I. Claims 1-9 (in part), drawn to a vinyl ester toughener wherein the toughener polymer is a trithiocarbonate compound of the formula X¹.
- II. Claims 1-9 (in part), drawn to a vinyl ester toughener wherein the toughener polymer is a dithiocarbonate compound of the formula H¹.
- III. Claims 1-9 (in part), drawn to a vinyl ester toughener wherein the toughener polymer is a dithiocarbamate compound of the formula F¹ or G¹.
- IV. Claims 10-15 (in part), drawn to a blend of vinyl ester resins comprising toughener from Group I.
- V. Claims 10-15 (in part), drawn to a blend of vinyl ester resins comprising toughener from Group II.
- VI. Claims 10-15 (in part), drawn to a blend of vinyl ester resins comprising toughener from Group III.
- VI. Claims 26-33 (in part), drawn to a blend of thermosettable resin and a toughener polymer, wherein the toughener polymer is one from Group I.

Art Unit: 1624

- VII. Claims 26-33 (in part), drawn to a blend of thermosettable resin and a toughener polymer from Group II.
- VIII. Claims 26-33 (in part), drawn to a blend of thermosettable resin and a toughener polymer from Group III.
- IX. Claims 34-37 (in part), drawn to crosslinked compositions made from compositions comprising a toughener from Group I.
- X. Claims 34-37 (in part), drawn to crosslinked compositions made from compositions comprising a toughener from Group II.
- XI. Claims 34-37 (in part), drawn to crosslinked compositions made from compositions comprising a toughener from Group III.

Claims 16-25 refer to "the crosslinked composition of claim ____" wherein the claim from which those claims depend is not drawn to a crosslinked composition, so those claims have not been included in this Requirement because they lack antecedent basis. Upon amendment, then those claims will be assigned a Group.

The inventions are distinct, each from the other because:

Inventions I-XI are unrelated chemically. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have **different modes of operation**, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation; the three primary types of vinyl ester toughener substances have different chemical structures, as would a crosslinked composition made from those substances would have a chemical structure different from one another as well.

Art Unit: 1624

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for any other of the Groups, restriction for examination purposes as indicated is proper.

Should one of Groups I, II or III be elected, and subsequently found allowable, then the corresponding Groups from IV-IX will be eligible for rejoinder. At such time, the Requirement for Restriction between the allowed Group and the rejoined Groups would be withdrawn.
